Fax: (08) 9734 4072

colshire@collie.wa.gov.au

Adopted by Council Resolution # 7164 on 13 September 2016.

The Shire of Collie

The Shire of Collie is located in the South West of Western Australia approximately 60 kilometres from the City of Bunbury and 200 kilometres from the City of Perth.

The Shire has an area of 1,685 square kilometres, with 80% of this area taken up with State Forest. The remaining 20% is utilised for significant industrial activities and urban and rural developments.

Data from the Australian Bureau of Statistics indicates the population of Collie in 2011 was 9,128 with the vast majority living within the Collie townsite.

Collie is well serviced with modern medical, dental and hospital facilities, art gallery, vibrant central park and skate park, primary and secondary schools, and early education centre. Excellent sporting facilities are available, including grass tennis courts, two golf courses, an indoor recreation centre, outdoor heated 50mtr and leisure pools, PCYC, lawn bowls, motor sports and strong sporting associations.

The Shire of Collie has a rich heritage influenced by the industrial activities of mining and power generation, and a strong sense of the environment generated by the surrounding waterways and forests.

Partnership Background

In 2003, the Minister for Community Safety wrote to Council advising of a new approach to crime prevention, which focused on Local Government areas and the development of local Community Safety and Crime Prevention partnerships and plans. The Minister invited Local Government to participate and offered the assistance of the WA Police Community Engagement Division to assist in forming a local Community Safety and Crime Prevention partnership.

The concept of the partnership was that Local Government and local people are perceived to be best positioned to understand local problems. Local Government was also acknowledged as being well placed to coordinate discussions of community safety and crime prevention issues because of its role in local planning, environmental management, economic development, urban design and community safety provision.

The vision Collie Shire Council has for the Community is for Collie to be a vibrant, growing and sustainable community where people want to live, visit and invest. Crime and community safety are two aspects intrinsic to providing a community where people want to live and visit.

Council resolved in January 2006 to sign a Community Safety and Crime Prevention Agreement, subject to the employment of a Community Development Officer. A Community Development Officer was employed by Council in March 2007.

Defining Community Safety and Crime Prevention

Community safety impacts on the quality of life where a high level of community safety enables residents to pursue all aspects of their lives without fear or hindrance from crime or antisocial behaviour. Community safety and crime prevention tackles issues that are both real and perceived, and as such includes issues such as addressing fear of crime.

Crime prevention can be categorised as primary, secondary, or tertiary. Primary crime prevention is targeted at changing the environmental conditions that provide opportunities for the occurrence of criminal or antisocial acts.

Secondary crime prevention is the early identification of potential offenders by intervening, seeking to prevent the criminal or antisocial behaviour from occurring. Tertiary crime prevention targets offenders and involves interventions to stop further offending.

Crime prevention refers to any measure taken to prevent crime and antisocial behaviour before it occurs. Risk factors such as age, socio-economic factors, low education, income, employment and alcohol abuse are strong indicators of people at risk of both committing crimes and becoming victims of crime.

Social crime prevention is about reducing the desire to commit crime through strategies and programs that address risk factors. Situational crime prevention is about reducing the opportunities for crime to occur.

The Plan

A Community Safety and Crime Prevention Plan is designed to reduce the social and economic costs of crime to the community by lowering both the number of cases coming before the criminal justice system, and by reducing the impact of crime on health and other social services.

The Plan focuses on crime prevention issues that affect communities at a local level.

Furthermore, the document needs to demonstrate that the process has met the WA Police Community Engagement Division requirements of:

- Being evidence based
- Consults widely with the community and engages with minority or marginalised groups
- Has an ongoing process for monitoring and evaluation

Methodology

CSCP Committee

The Community Safety and Crime Prevention Committee was established by Council to oversee the development and implementation of the Plan. It was the desire of Council that committee members would be representative of:

- Shire Councillors
- Council Officers
- Police
- The Indigenous community
- Youth
- Seniors
- The general public
- The health sector

The Terms of Reference for the committee allows for representative committee members to be elected from each of the following groups, if such groups desire to have representation:

- Shire of Collie Councillors
- Shire of Collie Officers
- W.A. Police
- A Justice of the Peace
- A representative from the Safety House Program
- A representative from the Collie Police and Community Youth Centre (PCYC)

The Terms of Reference also allows for the Committee to call upon consultants or guests with specific expertise as the need arises and invite them to attend meetings.

The committee commenced meeting in September 2007.

Community Consultation

Perceptions Survey

In 2009, 2011 and 2013, CATALYSE® Pty Ltd conducted a Community & Business Perceptions Survey for the Shire of Collie to evaluate and monitor performance across a range of Shire services and facilities. In 2015 the Community, Business and Youth Perception Surveys were completed via an online survey tool used by the Shire and survey information mailed out to all residents.

The community perception surveys were available for all residents to complete. Issues identified by the community as a whole in the 2015 survey as areas of low satisfaction and high priority were:

- Local employment (drive in /drive out, youth employment programs)
- Parking in the CBD (perceived lack of)
- Post secondary education options
- Youth activities
- River rehabilitation and restoration
- Antisocial behaviour

CSCP Survey

In 2015 the Community Safety and Crime Prevention Committee conducted a survey based on questions used in CSCP surveys conducted in previous years.

Community priorities identified through the survey were:

- Drugs
- House break-ins
- Speeding / dangerous driving
- Drunken / disorderly behaviour

Collie Alcohol and Other Drugs Plan 2015-2017

A forum was held on 24 May 2011 with key stakeholders to gauge support for the development of an Alcohol Management Plan [AMP] for Collie. Stakeholders present voted in support of the formation of such a working group and at its meeting on 29 June 2011 Council authorised the CSCP to form a sub-committee to guide the development and implementation of an AMP for Collie. At its Council meeting of 29 March 2016 Council changed this sub-committee to a working group to make the reporting process more streamlined and to better facilitate actions undertaken by the AMP working group.

The AMP working group consulted extensively with key stakeholders during the process of reviewing and updating the Collie Alcohol and Other Drugs Management Plan 2015 – 2017 (CAODMP). Meetings and forums were facilitated by the Senior Project Officer from the Mental Health Commission (formally the Drug and Alcohol Office), the Regional Tobacco, Alcohol & Other Drugs Coordinator from the WA Country Health Services-South West Unit, and the Collie Alcohol Project Officer.

The CAODMP actions and strategies address Key Priority 3: Reduced impact of alcohol and drug related harm in this plan.

The CAODMP is administered by the Project Officer for the Collie Alcohol and Other Drugs Management Plan, with St John of God as the auspice organisation.

State Alignment

The State Community Crime Prevention Plan is currently being updated by the Western Australian Police.

Once the State plan has been updated and released a review of the state alignment within the Collie Community Safety and Crime Prevention Plan 2016 – 2019 will take place.

The Collie Community Safety and Crime Prevention Plan demonstrates alignment with all five priorities in the 2011/2014 State plan.

The Key Priority and Action Areas set by the State Government in the 2011/2014 State Community Crime Prevention Plan are:

Priority 1: Early intervention to improve the wellbeing of children and families.

- *Parents are provided with an appropriate level of support and assistance in accessing relevant services during critical phases of the child's early formative years*
- ***Young people are provided with recreational and volunteer programs that encourage engagement with their community.***
- *Providing schools with the capacity to take action in addressing the particular circumstances of students who are at risk of persistent absence and behavioural problems.*
- *Identifying best practice early intervention programs and creating linkages and agreements where agencies can effectively share relevant information that enables them to better assist at-risk families, children and youth.*
- *Parents are offered assistance through Responsible Parenting Services, to address their children's anti-social or criminal behaviour, or school attendance issues.*

Priority 2: Youth justice and reducing re-offending.

- *Implementing the Youth Justice Strategy which aims to improve service provision to young people involved in the Youth Justice system.*
- ***Effective prevention and diversionary activities for youth through a coordinated strategic based approach to community-based, multi-agency initiatives. These initiatives should facilitate personal development, promote civic responsibility and improve long-term employment prospects.***
- *Effective case management of young people who offend and those at risk of offending which draws agencies and families together to target the specific risk factors of each young person.*
- *Young people in custody are provided with opportunities for rehabilitation, personal growth, education and skills development to assist them to successfully re-integrate back into the community.*

Priority 3: Preventing and responding to anti-social behaviour.

- ***The concept of positive citizenship will be promoted to connect children and young people with the community through activities that instil community values, respect and resilience. This will increase their likelihood of developing a socially responsible attitude.***
- ***Graffiti vandalism will be reduced by a multifaceted approach articulated in the State Tough on Graffiti Strategy. This Strategy ensures a range of effective reduction activities are spear-headed by ramped-up enforcement and offender management regimes. Local government authorities and agencies will be supported in their prevention/removal/reduction activities.***
- ***Hoon behaviour will be prevented by enforcing a range of strategies that target individuals and groups who persist in driving vehicles in a manner that created unnecessary risk to themselves and others.***
- *Responding to anti-social behaviour in housing through working collaboratively through the Disruptive Behaviour Management Strategy to address anti-social behaviour caused by public housing tenants.*
- *Preventing anti-social behaviour on transport by implementing a range of safety and security measures that increase the safety of passengers and employees who work for public transport providers.*
- ***Promotion of designing out crime to address community safety in public areas or building in terms both of reducing anti-social behaviour, crime and fear of crime. This will include the use of CCTV as a surveillance measure.***

Priority 4: Addressing and reducing drug and alcohol related crime.

- ***Prevention of harmful alcohol use through enforcement of liquor licensing laws, controlling access and availability, targeting harmful alcohol use including binge drinking, health promotion and responsible marketing, supply and service.***
- *Early intervention services that identify individuals, families and communities at risk through various initiatives under the Western Australian Diversion Program.*
- *Treatment and support strategies, including improved access to drug and alcohol treatment services for high risk populations, such as young people, Aboriginal people and communities and people with co-occurring mental health and drug and alcohol problems.*
- *A focus on strong law enforcement to reduce and control the availability of drugs and alcohol and implement strategies that aim to prevent or break the cycle of offending; such as high visibility in and around licensed outlets, increased compliance with relevant legislation, random breath and saliva testing, and focusing on drug seizures and the targeting of dealers.*
- *Provision of diversion to drug and alcohol treatment for offenders to intervene and divert offenders from the criminal justice system and into treatment programs.*

Priority 5: Targeting priority offences.

- *Management of prolific offenders using a standardised and multi-agency approach to effectively manage and target the small number of prolific offenders who account for a disproportionate amount of crime in the State.*
- *Rehabilitation of adult offenders through treatment services and programs to rehabilitate offenders who are amenable to intervention.*
- ***Working with local governments, industry and commercial agencies to make changes to buildings, public spaces and streets to make them safer and education potential victims about how to prevent crime in their homes, cars and lives.***
- *Prioritisation of all crimes involving violence against one or more persons and including community violence.*
- *Preventing family violence through strengthening community understanding and awareness, providing for the safety of adult and child victims and holding perpetrators accountable for their violent behaviour through the implementation of the WA Strategic Plan for Family and Domestic Violence 2009-2013.*
- *Facilitating treatment programs through the drug courts as part of the court process to break the cycle of substance misuse and offending.*
- *Monitoring emerging crimes that are affecting the community such as elder abuse, scam fraud, cyber bullying and hate crimes. Researching and delivering preventative practices to ensure that these crimes do not become prolific in the community.*
